ANESTHESIOLOGY	Page 2
COLON AND RECTAL SURGERY (PROCTOLOGY PROCEDURES)	Page 2
DERMATOLOGY	Page 3
GENERAL SURGERY	Page 3
MEDICAL/PEDIATRIC SUBSPECIALTY SERVICES REQUIRING ANESTHESIA	Page 4
OBSTETRICS AND GYNECOLOGY	Page 4
OPHTHALMOLOGY	Page 5
ORTHOPEDICS.....	Page 6
OTOLARYNGOLOGY-HEAD & NECK and FACIAL PLASTIC SURGERY	Page 7
PLASTIC AND RECONSTRUCTIVE SURGERY	Page 7
PSYCHIATRY	Page 8
RADIOLOGICAL PROCEDURES REQUIRING ANESTHESIA SERVICES	Page 8
THORACIC SURGERY	Page 8
VASCULAR SURGERY	Page 9
UROLOGY	Page 9
PODIATRIC SURGERY	Page 9

ANESTHESIOLOGY

General and Regional Anesthesia:

Procedures Requiring Privileges

Conscious Sedation

Regional Anesthesia

- Field Blocks

- Intravenous regional blocks (Bier-Block)

- Retrobulbar blocks

- Peripheral nerve blocks

- Brachial plexus blocks

- Spinal

- Epidural

General Anesthesia

Airway Management

- BVM (Bag Valve Mask Ventilation)

- ET Tube placement

- Laryngeal Mask Airway

- Nasotracheal tube placement

Anesthesiology CONSCIOUS SEDATION

Procedures Requiring Privileges

Diazepam

Versed

Barbiturates

Meperidine

Ketamine

COLON AND RECTAL SURGERY (PROCTOLOGY PROCEDURES)

Procedures Requiring Privileges

Fulguration for neoplastic disease - see also laser
External hemorrhoidectomy - see also laser
Internal hemorrhoidectomy - see also laser
Incision and drainage of perirectal abscess
Surgical treatment of anorectal fistula
Surgical treatment of anorectal fissure
Colonoscopy

Use of Laser: Requires additional training in specific laser use.

Fulguration for neoplastic disease: NdYAG, CO2
External hemorrhoidectomy: NdYAG, CO2
Internal hemorrhoidectomy: NdYAG, CO2

DERMATOLOGY

Procedures Requiring Privileges

Complex repair of surgical defects, flaps, and grafts with anesthesia services- **Requires additional training**
Liposuction - **Requires additional surgical training.**
Mohs micrographic surgery with anesthesia services - **Requires additional training.**

GENERAL SURGERY

Procedures Requiring Privileges

ABDOMINAL SURGERY

Laparoscopy - diagnostic

ANORECTAL PROCEDURES

Fulguration for neoplastic disease - see also laser
External hemorrhoidectomy - see also laser
Internal hemorrhoidectomy - see also laser
Incision and drainage of perirectal abscess
Surgical treatment of anorectal fistula
Surgical treatment of anorectal fissure
Colonoscopy - Diagnostic - with or without polypectomy **Requires additional training.**
Esophagogastroduodenoscopy - **Requires additional training.**

SKIN & APPENDAGES

table specialties

Printed: January 14, 2004 (8:29AM)

Management of burns with anesthesia services
Excision of muscle foreign body with anesthesia services

VASCULAR

Hemodialysis graft declot

OTHER

Thyroid biopsy only
Lymph node biopsy
Placement of central venous catheter
Lumbar puncture with anesthesia services
Breast biopsy only

Use of Laser: Requires additional training in specific laser use.

Fulguration for neoplastic disease: NdYAG, CO2
External hemorrhoidectomy: NdYAG, CO2
Internal hemorrhoidectomy: NdYAG, CO2

MEDICAL/PEDIATRIC SUBSPECIALTY SERVICES REQUIRING ANESTHESIA

Procedures Requiring Privileges

GASTROENTEROLOGY

Gastrosocopy - **Requires additional training**
Colonoscopy - **Requires additional training**

PULMONARY

Bronchoscopy (**excluding with laser**) with biopsy - **Requires additional training**
Transbronchial Biopsy (no lasers used) - **Requires additional training**

OTHER

Lumbar Puncture with anesthesia services

OBSTETRICS AND GYNECOLOGY

Procedures Requiring Privileges

Curettage of uterus for retained products of conception
Evacuation of vulvar hematoma due to obstetrical trauma

table specialties

Printed: January 14, 2004 (8:29AM)

- Management of fetal death
- Vacuum extraction for termination of pregnancy
- Cervical cerclage
- Dilatation and evacuation for termination of pregnancy
- Termination of pregnancy less than 14 weeks LMP

Diagnostic procedures used in evaluation of women with gynecologic or lower urinary tract conditions:

- Dilatation and curettage -- non-pregnant -sharp and suction
- Hysteroscopy - see also laser
- Laparoscopy - see also laser

Surgical procedures for correction of defects or treatment of conditions of the vagina, vulva and perineum:

- Bartholin cystectomy
- Excision of urethral caruncle - see also laser
- Hymenectomy
- Hymenotomy
- I&D Bartholin's abscess
- Perineorrhaphy
- Excision of vaginal, vulvar and perineal lesions - see also laser
- Anterior colporrhaphy
- Posterior colporrhaphy

Operative endoscopy (therapeutic):

- Laparoscopic procedures (specify) - see also laser
- Hysteroscopic ablation - see also laser
- Hysteroscopic polypectomy

In Vitro Fertilization:

- Oocyte Retrieval with anesthesia services - **Requires additional training**
- Embryo Transfer with anesthesia services - **Requires additional training**

Use of Laser: Requires additional training in specific laser use.

- Hysteroscopy: NdYAG
- Laparoscopy: CO2, KTP, ARGON and/or NdYAG
- Excision of urethral caruncle: CO2
- Excision of vaginal, vulvar and perineal lesions: CO2
- Laparoscopic procedures: CO2, ARGON, NdYAG
- Hysteroscopic ablation: NdYAG

table specialties

Printed: January 14, 2004 (8:29AM)

OPHTHALMOLOGY

Procedures Requiring Privileges

Radial Keratotomy
Astigmatic Keratotomy
Automated Lamellar Keratoplasty - SEE ALSO LASER.
Blepharoplasty - SEE ALSO LASER.
Retrobulbar block
Repair of lacerations
Removal/excision of lid tumors
Lacrimal sac surgery - **requires additional training** -SEE ALSO LASER
Cataract surgery - SEE ALSO LASER.
Intraocular lens implantation
Glaucoma surgery - **requires additional training** - SEE ALSO LASER.
Corneal lacerations
Corneal foreign bodies
Pterygium excision
Retinal surgery -**requires additional training** - SEE ALSO LASER.
Keratoplasty
Corneal or refractive surgery - please specify technique - SEE ALSO LASER.
Anterior chamber paracentesis
Photorefractive Keratectomy (PRK) without laser.
Phototherapeutic Keratectomy (PTK) without laser.

Use of Laser: Requires additional training in specific laser use.

Automated lamellar keratoplasty: Excimer
Lacrimal sac surgery: CO2, NdYAG, Argon
Cataract surgery: NdYAG
Glaucoma surgery: Argon, NdYAG, Diode
Retinal surgery: Argon, Diode
Photorefractive Keratectomy (PRK) Excimer
Phototherapeutic Keratectomy (PTK) Light
LASIK Excimer
Blepharoplasty: CO2 and Erbium

ORTHOPEDICS

Procedures Requiring Privileges

Closed fracture reduction with anesthesia services
Arthroscopic surgery of the knee
Arthroscopic surgery of the shoulder
Arthroscopic surgery of the wrist - **requires additional post graduate training**
Ganglion removal
Carpal tunnel decompression

table specialties

Printed: January 14, 2004 (8:29AM)

Surgery of the hand - **requires additional post graduate training**
bone graft pertaining to the hand
nerve graft
tendon reconstruction (free graft, staged)
tendon release
tendon repair
tendon fixation
tendon transfers or arthroplasty of large and small joints, including implants
Surgery of the foot - **requires additional post graduate training**
ankle arthroscopy - **requires additional training**
Adult ankle and foot reconstruction - **requires additional training**

OTOLARYNGOLOGY-HEAD & NECK and FACIAL PLASTIC SURGERY

Procedures Requiring Privileges

Surgery of outer ear - see also laser
Tube placement into middle ear (myringotomy or tympanocentesis)
Other (ear) Must be specified.
Electrocautery of anterior epistaxis
Tonsillectomy/Adenoidectomy
Surgery of external nose - see also laser
Other (nose) *Please specify and provide supporting documentation on a separate page:*

Endoscopic Procedures of Nasopharynx/larynx - see also laser
Facial Plastic Surgery Procedures - see also laser. Must be specified.
Liposuction of head/neck -**Requires additional training.**

Use of Laser: Requires additional training in specific laser use.

Surgery of the outer ear: Ruby
Surgery of the external nose: Ruby or CO2
Endoscopic procedures of nasopharynx/larynx: CO2
Facial plastic surgery procedures: Ruby (for pigmentation problems) and Candela

PLASTIC AND RECONSTRUCTIVE SURGERY

Procedures Requiring Privileges

TREATMENT OF SKIN NEOPLASMS, DISEASES AND TRAUMA
Scar revisions - see also laser

SURGERY OF THE BREAST
Breast augmentation
Breast reduction

table specialties

Printed: January 14, 2004 (8:29AM)

Mastopexy

TREATMENT OF FACIAL DISEASES AND INJURIES INCLUDING MAXILLOFACIAL STRUCTURES

Nose deformity/ septal surgery
Ear deformity
Jaw deformity/ chin augmentation
Eyelid deformity

SURGERY OF THE HAND AND EXTREMITIES - **Requires additional training.**

Hand wounds
Tendon injuries (flexor, extensor)
Reductions of **closed** fractures of the hand and/or wrist with anesthesia services
Nerve injuries

COMPLEX WOUND HEALING AND BURN TREATMENT

Acute superficial or partial thickness burns covering less than 20% of body surface area in adults (other than hands, feet, head, neck or perineum) with anesthesia services

COSMETIC SURGERY

Facial contouring
Therapeutic injections for contour or scar modifications
Cosmetic tattooing of eyelids
Blepharoplasty
Liposuction - **Requires additional training**
Rhinoplasty
Chin augmentation
Skin lesion, subcutaneous skin lesion

Use of Laser: Requires additional training in specific laser use.

Scar revisions: Tunable dye or Ruby

PSYCHIATRY

Procedures Requiring Privileges

sodium amytal interview
electroconvulsive therapy

table specialties

Printed: January 14, 2004 (8:29AM)

RADIOLOGICAL PROCEDURES REQUIRING ANESTHESIA SERVICES

Procedures Requiring Privileges

INVASIVE AND INTERVENTIONAL DIAGNOSTIC RADIOLOGY

Cerebral Angiography
Aortic (Thoracic & Abdominal Angiography)
Peripheral Angiography
Pulmonary Angiography
Lymphangiography
Venography

THORACIC SURGERY

Procedures Requiring Privileges

Bronchoscopy with prefatory endotracheal intubation - see also laser
Excision, biopsy and exploration of scalene node
Excision, biopsy and exploration of cervical node

Use of Laser: Requires additional training in specific laser use.

Bronchoscopy with prefatory endotracheal intubation: NdYAG

VASCULAR SURGERY

Procedures Requiring Privileges

Placement of central venous catheter
Insertion and revision of dialysis catheters, venous access devices and infusion pumps
Insertion and revision of peritoneal dialysis catheters
Injection of intravenous sclerosing solutions

UROLOGY

Procedures Requiring Privileges

Cystoscopy and retrograde pyelography -with biopsy and fulguration - see also laser
Surgery of the testes and appendages - vesicles, vas and cord
Lithotripsy - see also laser
Cystotomy
Prostatic biopsy

table specialties

Printed: January 14, 2004 (8:29AM)

Fulguration for neoplastic disease - see also laser

Use of Laser: Requires additional training in specific laser use. (Generally not indicated for in-office practice.)

Cystoscopy and retrograde pyelography – with biopsy and fulguration: NdYAG and Holmium

Lithotripsy: Holmium and Candela

Fulguration for Neoplastic disease: NdYAG and Holmium (for bladder).

PODIATRIC SURGERY

Procedures Requiring Privileges

I.P. sesamoidectomy of hallux with anesthesia services

Bunionectomy with anesthesia services

Metatarsal osteotomy/Head 2-5

Metatarsal head resection

MPJ/IPJ capsulotomy - see also laser

Digital amputations (partial)

Plantar fasciotomy/fasciectomy - see also laser

Ray resection

Repair lacerated tendons

Incision & drainage, deep fascial plane infection

Syndactyle/desyndactyle

Skin grafts, dorsal

Excision of accessory bones

Osteotomies of tarsals, open/closed & wedge

Arthroscopic surgery (Foot & Ankle) - see also laser

Bone Stimulation Implant

Use of Laser: Requires additional training in specific laser use.

warts

neoplasm

Biopsy

nail procedures
